

AASHMAN SAINI

9811013709 | aashman.saini@gmail.com | [LinkedIn](#) | Delhi, India

PROFESSIONAL SUMMARY

Engineered and deployed machine learning models, NLP chatbots, and analytical pipelines across production environments. Leverage Python, SQL, TensorFlow, Scikit-learn, and Power BI to deliver deep learning solutions, predictive modeling, feature engineering, statistical analysis, and end-to-end model deployment. Hold dual AWS certifications. Actively targeting Data Science, AI/ML Engineering, and Data Analytics roles.

EDUCATION

Bachelor of Technology — Information Technology

Expected May 2026

Maharaja Surajmal Institute of Technology, Delhi

GPA: 7.0/10

Nirmal Bhartia School, Delhi (CBSE)

10th: 94% (2020) | 12th: 94% (2022)

TECHNICAL SKILLS

Languages: Python, SQL, Java, C, C++, R, HTML, CSS

ML/AI: RAG pipelines, TensorFlow, Keras, Scikit-learn, Neural Networks, Deep Learning, LSTM, Transformer, GRU, Random Forest, Decision Tree, K-Means, Model Deployment, Model Training

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Data Visualization, Statistical Analysis, Power BI, Excel, Jupyter Notebook, Tableau, Predictive Modeling, Feature Engineering, Data Wrangling, Model Optimization

Cloud/Databases: AWS (AI Practitioner, ML Engineer), MySQL, PostgreSQL

Tools: Git, GitHub, Flask, PHP, API Integration

CERTIFICATIONS

- AWS Certified AI Practitioner — Foundational (2025–2028)
- AWS Certified Machine Learning Engineer — Associate (2025–2028)
- AWS Certified Generative AI Developer — Professional (2025–2028)
- Microsoft Certified: Power BI Data Analyst Associate (2024–2025)

PROFESSIONAL EXPERIENCE

AI/ML Engineer Intern | MBD Alchemie Pvt. Ltd. (MBD Group) | Aug 2025 – Dec 2025

- Developed production-ready ML models and integrated an AI-powered NLP chatbot on the Aasoka platform.
- Applied deep learning techniques and model evaluation pipelines for live production AI systems.
- Contributed to deploying AI systems serving 500,000+ student users on the Aasoka platform.

Data Analyst Intern | DNISPL | Jun 2024 – Sep 2024

- Built Python-based automated workflow tool streamlining daily data entry processes, reducing processing time by ~40%.
- Managed 10,000+ line enterprise database for 3–4 high-value B2B clients.
- Performed statistical analysis and data wrangling; generated business intelligence reports using Matplotlib and Seaborn.

PROJECTS

Stock Prediction System | Python, TensorFlow, LSTM, Transformer, Flask | 2025

- Built stock prediction platform on 5 years of data; achieved 0.0006 epoch loss across 4+ models (LSTM, RNN, GRU, Random Forest, Transformer).
- Developed full-stack web app with integrated conversational AI system using Flask, Pandas, NumPy, Scikit-learn.
- Performed statistical analysis and data visualization using Matplotlib and Seaborn for model performance reporting.

Hospital Management System | Power BI, Python, SQL, IoT | 2024

- Created Power BI dashboard with visual analytics for real-time patient tracking and predictive patient readmission risk modeling.
- Integrated IoT data and automated alerts; deployed conversational AI system for patient query resolution.

Traffic Prediction System | Python, Scikit-learn, LSTM | 2024

- Developed analytical pipelines for real-time traffic monitoring achieving 85%+ prediction accuracy.
- Built real-time traffic flow prediction system using feature engineering and model optimization across Linear Regression, Decision Tree, K-Means, and LSTM algorithms.
